

October 12, 1982

Memo to File:

RE: Luki Milling Corporation
Tibbetts Placer Mine
ACT/019/001
Grand County, Utah

On October 6, 1982, Susan Linner, Carolyn Driscoll and Jim Smith visited the above operation and talked with the caretaker of the adjacent private property. All mining equipment had been removed from the site with the exception of a front-end loader which was currently inoperative. Mr. C. J. Hart had been on the property Monday, October 4 trying to fix the loader. All trash had been removed, but a minor amount of grading and backfilling of a small pit needed to be accomplished, as well as seeding. A motor patrol was supposed to be brought in the week of October 12. The area between the surface facilities site and the river which had been grubbed of vegetation has almost totally revegetated itself naturally with willows, tamarisk and salt grass, so there should be no problem with successful reclamation of this area. Mr. Hart should be contacted with a follow-up letter and another site inspection should be made soon.
